Contents of volume 53, 2004

Part 1

Estimating catch at age from market sampling data by using a Bayesian hierarchical model
D. Hirst, S. Aanes, G. Storvik, R. B. Huseby and I. F. Tvete 1

Period analysis of variable stars by robust smoothing
H.-S. Oh, D. Nychka, T. Brown and P. Charbonneau 15

Statistical image analysis for a confocal microscopy two-dimensional section of cartilage growth
F. Al-Awadhi, C. Jennison and M. Hurn 31

Repeated screening with inspection error and no false positive results with application to pharmaceutical pill production
M. Gasparini, H. Nusser and J. Eisele 51

Tests for a difference in timing of physiological response between two brain regions measured by using functional magnetic resonance imaging
S. Landau, I. C. Ellison-Wright and E. T. Bullmore 63

Estimating percentiles of uncertain computer code outputs
J. Oakley 83

Chebyshev's inequality for nonparametric testing with small N and α in microarray research
T. M. Beasley, G. P. Page, J. P. L. Brand, G. L. Gadbury, J. D. Mountz and D. B. Allison 95

Evaluation of trace evidence in the form of multivariate data
C. G. G. Aitken and D. Lucy 109

Conditional methodology for individual case history data
E. A. Catchpole, B. J. T. Morgan and T. Coulson 123

Simple pilot procedures for the avoidance of disconnected experimental designs
J. D. Godolphin 133

Models for longitudinal data with censored changepoints
C. H. Jackson and L. D. Sharples 149

Principal component analysis of landmarks from reversible images
C. M. Theobald, C. A. Glasbey, G. W. Horgan and C. D. Robinson 163

Analysis of longitudinal multiple-source binary data using generalized estimating equations
L. M. O'Brien and G. M. Fitzmaurice 177

Bayesian analysis of discrete time warranty data
D. Stephens and M. Crowder 195

The 1970 US draft lottery revisited: a spatial analysis
J. Mateu, F. Montes and M. Plaza 219

Part 2

A spatiotemporal model for Mexico City ozone levels
G. Huerta, B. Sansó and J. R. Stroud 231

Bayesian analysis of directed graphs data with applications to social networks
P. S. Gill and T. B. Swartz 249

A hierarchical modelling approach for measuring reliability and agreement between two types of magnetic field dosimeter
A. R. Brazzale, A. Salvan and S. Roletti 261

Generalized linear models with a coarsened covariate
S. Lipsitz, M. Parzen, S. Natarajan, J. Ibrahim and G. Fitzmaurice 279

Non-ignorable missing covariate data in survival analysis: a case-study of an international Breast Cancer Study Group trial
A. H. Herring and J. G. Ibrahim 293

Combining genotype groups and recursive partitioning: an application to human immunodeficiency virus type 1 genetics data
A. S. Foulkes, V. De Gruttola and K. Hertogs 311

Designing fractional factorial split-plot experiments with few whole-plot factors
D. R. Bingham, E. D. Schoen and R. R. Sitter 325

A Bayesian method for estimating the accuracy of recalled depression
C. M. Rutter and G. Simon 341

Temporal pattern in number of staff on sick leave: the effect of downsizing
G. Kauermann and R. Ortlieb 355

A litter-based approach to risk assessment in developmental toxicity studies via a power family of completely monotone functions
A. Y. C. Kuk 369

A semiparametric multilevel survival model
W. Zhang and F. Steele 387

Part 3

Detection and correction of artificial shifts in climate series *H. Caussinus and O. Mestre* 405

Optimal predictive sample size for case–control studies *F. De Santis, M. Perone Pacifico and V. Sambucini* 427

A class of distribution-free control charts *S. Chakraborti, P. van der Laan and M. A. van de Wiel* 443

Semiparametric mixture models and repeated measures: the multinomial cut point model *I. R. Cruz-Medina, T. P. Hettmansperger and H. Thomas* 463

Bayesian analysis of dynamic magnetic resonance breast images *F. de Pasquale, P. Barone, G. Sebastiani and J. Stander* 475

Estimation and prediction for low degree polynomial models under measurement errors with an application to forest harvesters *T. Nummi and J. Möttönen* 495

Modelling growth and decline in lung function in Duchenne's muscular dystrophy with an augmented linear mixed effects model *M. A. Scott, R. G. Norman and K. I. Berger* 507

Analysis of a longitudinal ordinal response clinical trial by using dynamic models *P. J. Lindsey and J. Kaufmann* 523

Part 4

Simple component analysis *V. Rousson and Th. Gasser* 539

Tests for cycling in a signalling pathway *T. G. Müller, D. Faller, J. Timmer, I. Swameye, O. Sandra and U. Klingmüller* 557

Robust designs for linear mixed effects models *M. P. F. Berger and F. E. S. Tan* 569

Bayesian updating of atmospheric dispersion after a nuclear accident *K. Politis and L. Robertson* 583

Tumour incidence, prevalence and lethality estimation in the absence of cause-of-death information *T. Härkänen and E. Arjas* 601

Regression-based estimation of the false negative fraction when multiple negatives are unverified *C. J. Lloyd and D. J. Frommer* 619

Effectiveness of potent antiretroviral therapy on progression of human immunodeficiency virus: Bayesian modelling and model checking via counterfactual replicates *C. Berzuini and C. Allemani* 633

A new 'biased coin design' for the sequential allocation of two treatments *A. Baldi Antognini and A. Giovagnoli* 651

Corrigendum: Evaluation of trace evidence in the form of multivariate data *C. G. G. Aitken and D. Lucy* 665
